(54) Title: **PHARMACEUTICAL COMPOSITIONS COMPRISING DANAZOL**

(57) Abstract: A controlled release pharmaceutical comprising danazol has the property of slow release of danazol over an ex-
tended period of time and markedly increased bioavailability compared to commercially available danazol-containing products. The
pharmaceutical composition comprises danazol dissolved in a solid vehicle or carrier and is especially suitable for oral solid dosage
forms. The composition significantly reduces food effect and may reduce side effects.
